

# ADVANCED PYTHON PROGRAMMING

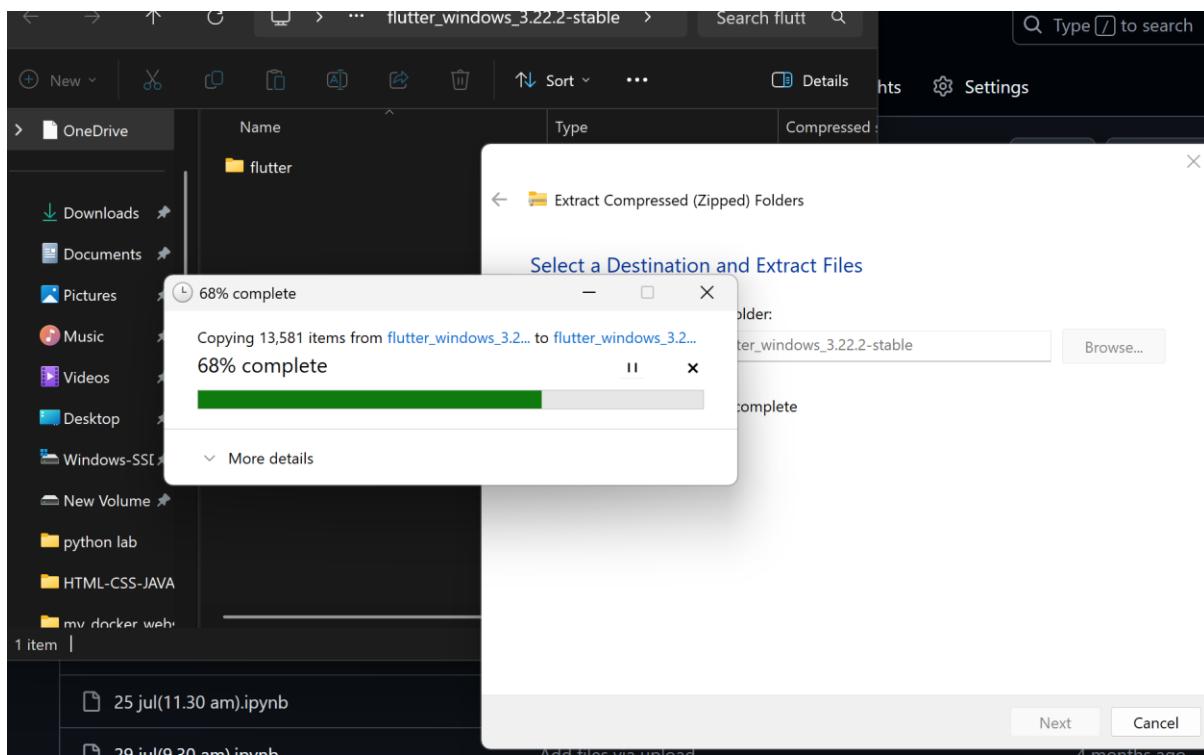

**NAME:AGNES RACHEL.E**

**REG.NO:22MID0181**

**SLOT:L7+L8+L27+L28**

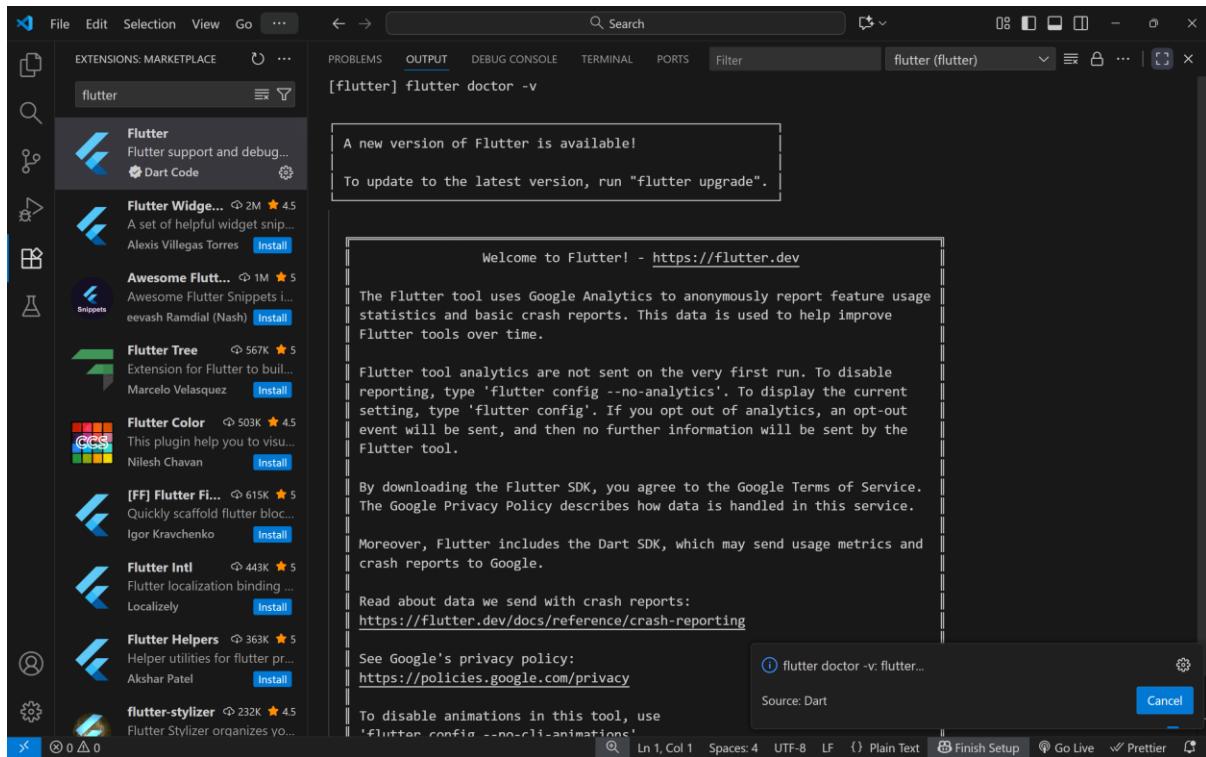

## FLUTTER:

Install and extract flutter sdk:

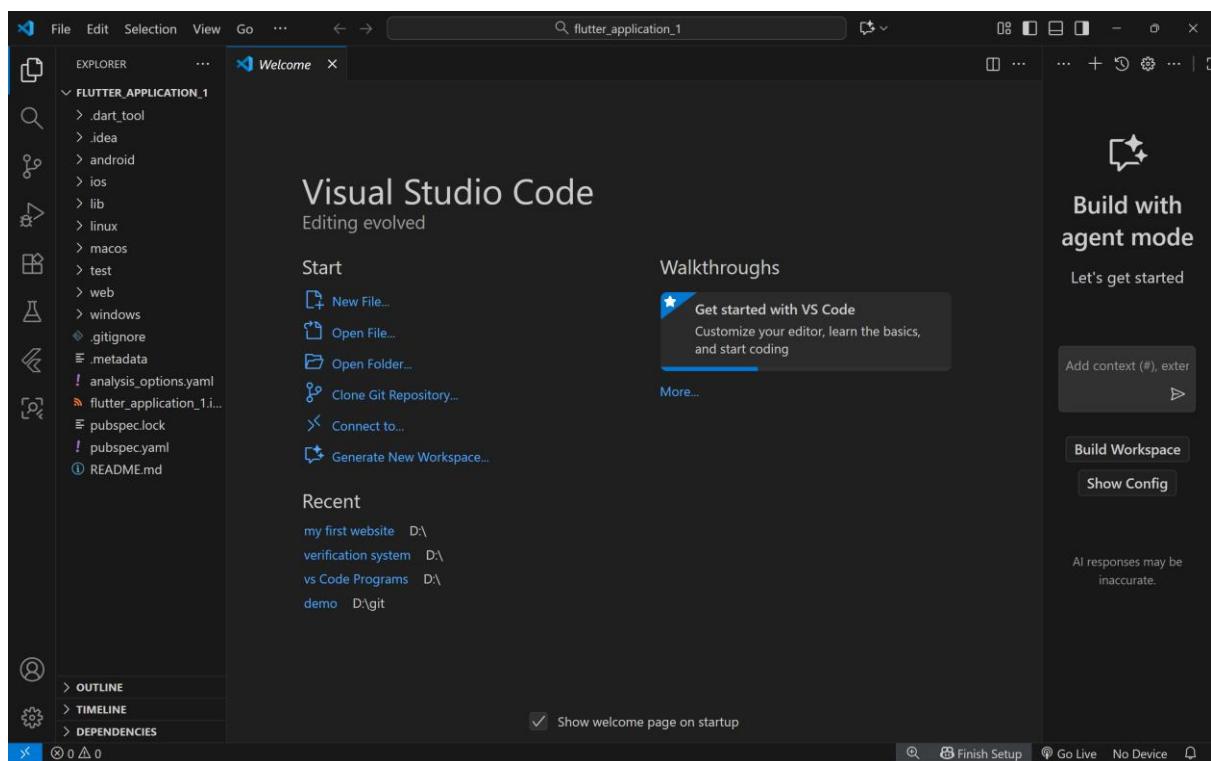

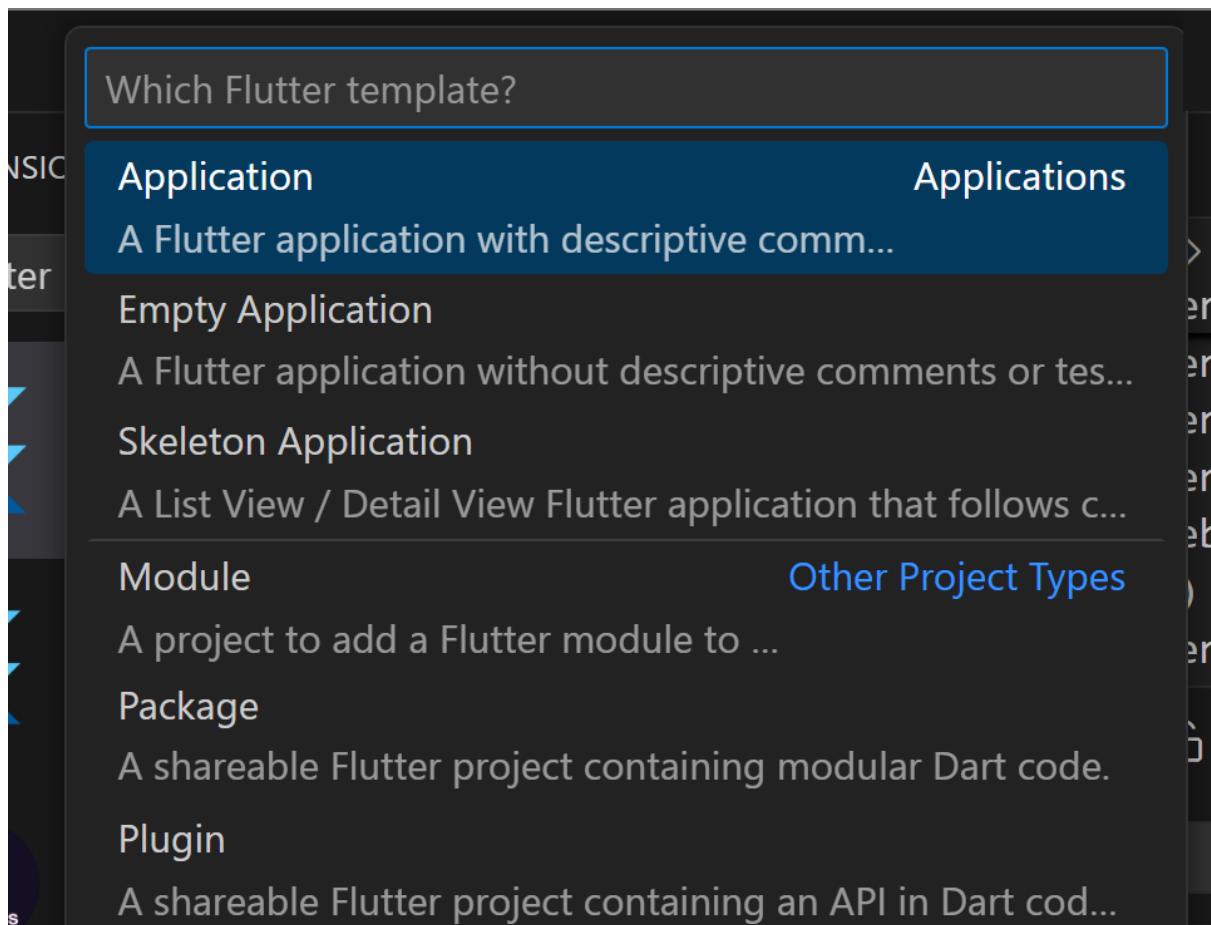

After installation, it's important to verify that everything is configured correctly.

1. Open the Command Palette by pressing **Ctrl + Shift + P** (or **Cmd + Shift + P** on macOS).
2. Type **doctor** into the palette.
3. Select the command **Flutter: Run Flutter Doctor**.
4. The **Output** panel will open and display the results. This will help you identify any missing dependencies or configuration issues.

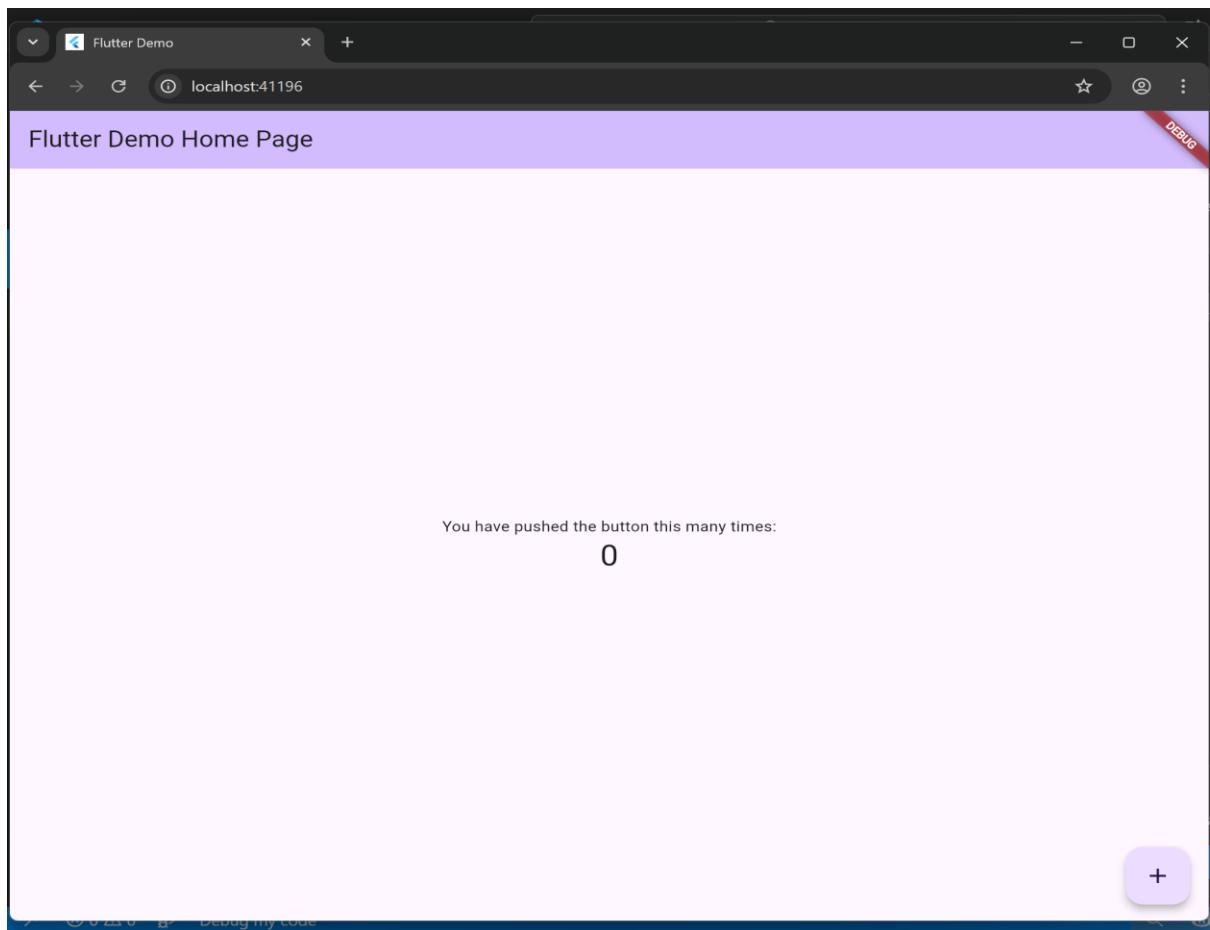

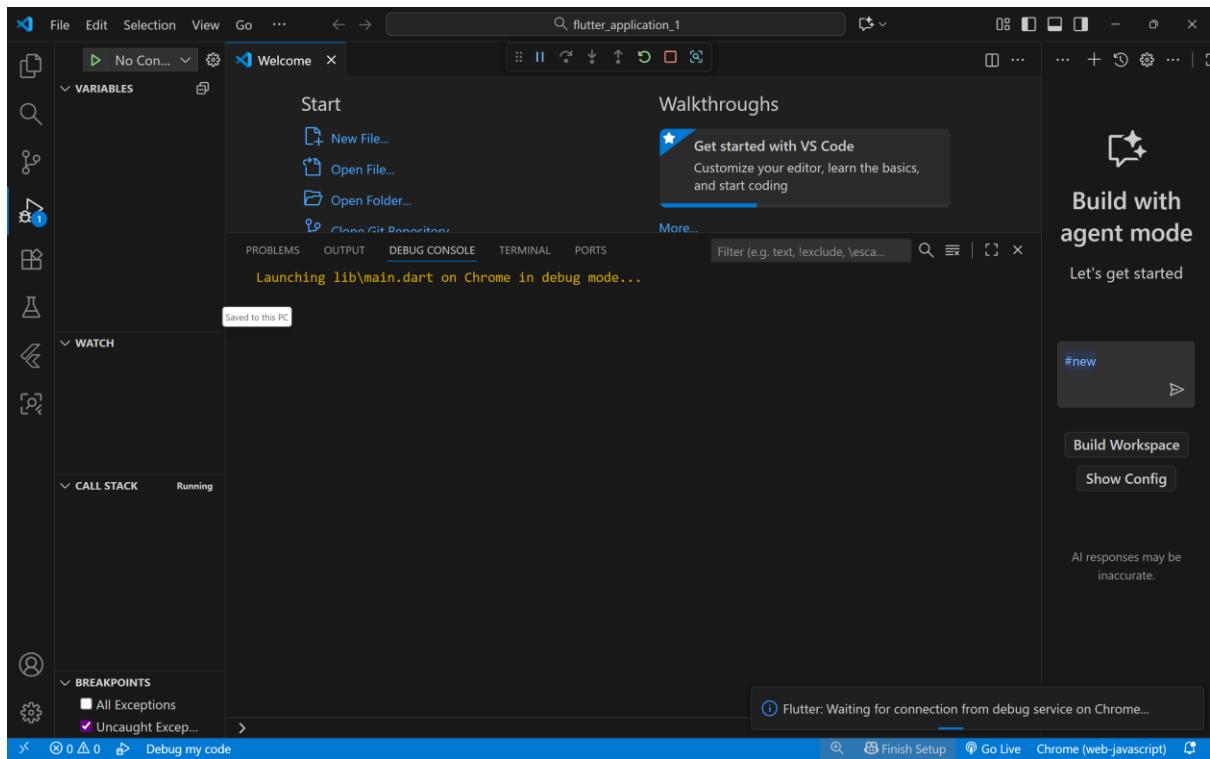

## To Create a New Project:

1. Open the Command Palette (Ctrl/Cmd + Shift + P).
2. Type **flutter** and select **Flutter: New Project**.
3. Choose the **Application** template and press Enter.
4. Select a folder on your computer to save the project.
5. Enter a project name (e.g., `my_first_app`) and press Enter. VS Code will create the project and open it in a new window.

Then click run and debug:

If you click + it will increase the number
